Bower – Project Card Copy

October 26, 2026

Card copy

Title	Bower
Subtitle	An AI tool for generating aircraft spare parts lists
Description	Drafts customer-ready provisioning lists for each fleet in minutes, generates budget and service level scenarios, and explains every trade-off - replacing a slow, expert-driven process for a leading business jet manufacturer.
Status pill	Phase 2 - design

Notes

• Lengths match the Warden card: subtitle 8 words, description 30 words.

• The client is anonymised ("a leading business jet manufacturer"), as Warden does with its client.

• "Drafts" and "generates" describe AI-driven list generation by the optimization engine; avoid "document-writing agent", which suggests an LLM writes the lists.
